

## Truvox International steams ahead with additions to the Multiwash™ PRO range

11 months ago

Global floorcare solutions specialist, [Truvox International](#) has expanded its successful Multiwash™ PRO scrubber dryer range, with the addition of the new Multiwash™ PRO Steam.

The new model not only provides exceptional cleaning results due to its counter-rotating brushes, but with the additional steam function, it also sanitises floors, killing up to 99.99% of bacteria.

The evolution of Multiwash™

“It’s hard to believe that we launched the new Multiwash PRO range over two years ago,” says Truvox International Executive Director, Gordon McVean. “Our popular Multiwash II had been the benchmark for scrubber dryers for so many years and when we launched the PRO range our customers were surprised that we had been able to make it even better.

“As a leading global manufacturer and supplier of commercial and industrial floorcare machines, we have always prided ourselves in listening to our customers and the addition of Steam to the Multiwash PRO stable is a direct result of customer input coupled with our own diligent push for innovation and technical excellence.

“Evolving the Multiwash platform from the Multiwash II to the Multiwash PRO was a great example of our constant journey to improve our product lines. We invested heavily to re-design the machine which effectively and efficiently delivers increased productivity. In fact, the versatile machine’s increased brush diameter consistently delivers up to 12% more scrubbing power.

“Each machine in the Multiwash PRO range washes, scrubs and dries in a single pass, giving improved and unrivalled cleaning results, and leaving floors ready for customers and staff to walk on.”

Enter Multiwash™ PRO Steam...

The new easy to use Multiwash PRO Steam model provides exceptional cleaning results across multiple floor types – due to its counter-rotating brushes – and with the additional steam function, it delivers quick and easy cleaning, and saves time as the steam helps to shift stubborn marks and dirt.

The new Multiwash PRO Steam also sanitises floors. Tested in a certified lab to remove >99.99% of S. aureus, E. coli, P. aeruginosa and B. subtilis bacteria, it improves hygiene, and delivers improved infection control, as with the addition of the steam, dirt and grime are removed more easily than with traditional cleaning methods.

The Multiwash PRO Steam is also kinder to the environment for a range of sectors, including hospitals, care homes and veterinary practices, as it cleans using only water and does not need any hazardous chemicals or disinfectants.

“Listening to what our loyal customers need and expect when it comes to effective and efficient floor cleaning, our new Multiwash PRO Steam model has been designed to be better, faster and stronger than other machines which are currently available,” says Gordon McVean.

... and soon... Multiwash™ PRO Battery

Truvox International is also close to launching the new Multiwash PRO Battery scrubber dryer which was previewed at Interclean in Amsterdam in May. Ideal for areas without power, it provides exceptional cleaning results. With a run-time of up to 60 minutes, it delivers excellent productivity and with no trailing cables, it minimises the risk of trips and slips. With a 2-hour charge time and a quick-change battery system, it also ensures minimum down-time when charging.

“We are proud that all our floorcare machines have the reputation of being simple to use and easy to maintain. Since the pandemic, hygiene has become the biggest priority in all premises and cleaning has become more of a ‘front of house activity’, so the other priority has always been to ensure that our machines look great. These two new additions to the Multiwash PRO range certainly follow those principles.”
