

PTSG delivers fire solutions at waterside development

1 year ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist fire solutions at a prestigious canal-side new-build development in Milton Keynes.

Campbell Wharf offers one-, two- and three-bedroom apartments designed to cater to the needs of modern families and urbanites alike. Occupying an enviable position on the banks of the Grand Union canal, these new apartments are surrounded by expansive green spaces as well as having amenities including top-tier schools.

Block 5 will comprise 85 residential units and associated parking. Engineers from [PTSG Fire Solutions Ltd](#) will deliver sprinkler systems to protect buildings and residents in the event of a fire. Sprinklers are the most effective means of life and property protection available. PTSG designs, installs, tests and inspects, services and maintains systems for residential and commercial buildings of all kinds.

PTSG delivers a range of other fire and security assets including dry and wet risers, fire extinguishers and passive fire protection such as fire doors, fire-rated glazing and fire compartmentation. This, along with the Group's other services, can meet the complete specialist services requirements of its customers.
