

PTSG helps close the door on fire

9 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist fire solutions for one of the most recognised brands in American financial services.

The company's lending products and payment services go far beyond consumer credit, to enable millions of merchants to run their businesses, to explore new markets, power fin-tech companies and, most importantly, to help people to build a brighter financial future. The company's network provides card acceptance at millions of businesses and cash access locations. Its Diners Club International has acceptance in more than 185 countries and territories.

In this contract, engineers from [PTSG Fire Solutions Ltd](#) will attend site in Farnborough, Hampshire, to replace a new ground-floor fire door as the existing unit is compromised due to wear and tear, post-audit. The client asked for the door and overhead panel to be supplied and fitted out of hours. They also asked if PTSG's team could source the door and overhead panel from the original supplier, ensuring it was an exact match of the other fire doors in the building.

Each year, PTSG delivers specialist passive fire protection services to thousands of properties across the UK in sectors including social housing, local authorities, education, student accommodation and security-sensitive offices.
