

Meta brings the future to facilities management with VR training

8 months ago

Global technology business [Meta](#) and the London-based interactive training platform [MOONHUB](#) have partnered to bring virtual reality to the facilities management industry.

MOONHUB will offer its industry-leading Titan VR training application exclusively on Meta Quest headsets.

Launched in 2016 by CEO Dami Hastrup, MOONHUB is reshaping learning and development through its CPD-accredited immersive VR learning experiences and patented Spot and Jot technology.

Titan VR replicates real-world scenarios to create a hands-on learning environment that's secure, cost-effective and minimises reliance on physical resources. It produces unique employee insight on skills and performance, enabling management to make better-informed data-driven decisions.

Partnering with various facilities management providers, MOONHUB and Meta have spearheaded an 800% increase in training sessions across the sector, making VR training the industry norm in a safe and engaging environment.

They will demonstrate their unique offering at a Meta event on 26th November in London.

On the partnership, Christine Trodella, Vice President, Commercial Sales at Meta, said: "At Meta, we're excited to bring the power of mixed reality to help create immersive training experiences designed to meet our customers' needs and objectives across a diverse field of industries. By combining the immersive capabilities of our Meta Quest headsets with Moonhub's Titan VR training application, Moonhub has created a unique opportunity for professionals to experience the future of training and operations without needing physical facilities or equipment. Moonhub's realistic training solution has the potential to

revolutionize the way teams approach security and facilities management, and Meta is thrilled to empower innovative learning and training solutions in mixed reality using the industry-leading Quest platform.”

Dami Hastrup, MOONHUB CEO, added: “We’ve seen an incredible reception to TITAN, our security training designed for the FM sector and security personnel all over. Historically, MOONHUB has worked closely with its clients and stakeholders to create tailored solutions. However, it became apparent that there was a need for our content to be scalable, quick and cost-effective to deploy.”

Meta and MOONHUB are hosting an event at Meta’s London office (10 Brock Street) on 26th November from 10am to 1pm to showcase the collaboration on *The Future of Facilities Management Training*.
