

PTSG praised in higher education project

9 months ago

Premier Technical Services Group Ltd (PTSG), via constituent company Total Environmental Compliance (TEC), has completed a project in which it delivered water hygiene services in a contract with a higher education provider.

Engineers from PTSG Water Treatment Ltd completed a full thermal survey which showed that the thermal regime throughout the education provider's property portfolio was not adequate for purpose. A proposal was accepted which saw PTSG install and commission several chlorine dioxide dosing units across the sites.

As students were due to start a new term imminently, PTSG wasted no time in completing the remedial works- within the 21-day deadline.

The Hard FM Manager on this contract praised PTSG's team for its "Great work and speed of turnaround to get the site back to a great place from a water hygiene perspective".

PTSG offers a wide range of services in industrial water hygiene and water treatment, combining the specialist skills and knowledge of its engineers with the very latest cutting-edge tools to deliver high performance, safety and consistency. The Group is a trusted partner to its clients, ensuring water safety, protection from Legionella and decontamination from many other bacteria and viruses.
