

PTSG's expertise goes down well at Starlaw Distillery

8 months ago

Premier Technical Services Group Ltd (PTSG), via constituent company HCS Water Treatment (HCS), has been contracted to support Starlaw Distillery with specialist water treatment services.

Starlaw Distillery (sometimes known as Glen Turner distillery) is a grain whisky distillery located at Bathgate in West Lothian, Scotland. The distillery opened in 2010 and is owned by French drinks group La Martiniquaise, as part of its Scottish subsidiary Glen Turner Company.

The distillery is integrated with a vatting, blending and bottling plant and has a capacity of 400,000 bottles per year. The distillery can produce 25 million litres annually and has 29 ageing warehouses (cellars) across 75 hectares at the distillery to allow for the maturation of over 600,000 barrels.

In this contract, engineers from HCS will deliver a variety of water treatment services to help ensure that New Craigs has clean and hygienic water and that its assets and systems are fully operational and compliant with the latest industry regulations.

PTSG has extensive experience of successfully managing multiple water hygiene and water treatment contracts for customers in many different industry sectors.
