

SPACE Facilities Management awarded ISO 41001:2018 certification

1 year ago

[SPACE Facilities Management](#) has been awarded ISO 41001:2018 certification, an internationally recognised standard that reflects the company's commitment to delivering superior facilities management services. Held by only a select number of UK companies, this certification distinguishes SPACE FM as a champion in operational excellence and sustainability.

ISO 41001:2018 is the first global standard for facilities management, established to improve efficiency, optimise workplace environments, and enhance overall performance in organisations. Achieving this certification demonstrates SPACE FM's dedication to implementing best practices, aligning with global standards, and ensuring customers benefit from high quality service.

To achieve this prestigious certification, the process involved a thorough audit of the company's systems, processes, and workflows, ensuring compliance with the rigorous standards set forth by ISO 41001:2018.

Stuart Craig, Director of Facilities Management at SPACE noted: "We are incredibly proud to have been awarded ISO 41001:2018 certification. This reflects our commitment to operational excellence, and it reinforces the value we provide to our customers by optimising their environments for greater efficiency and sustainability. This milestone not only validates the hard work and expertise of our team but also provides our clients with confidence in our ability to deliver world-class facilities management services."

With this certification, SPACE FM further strengthens its reputation as a trusted partner for businesses looking to enhance their workplace environments. The team's ongoing dedication to continuous improvement ensures clients can rely on its innovative, sustainable, and effective solutions for facilities management.
