

Taconova UK Sets Sights on Growth with Strategic Move to New Premises

10 months ago

[Taconova UK](#), a leading provider of intelligent comfort heating solutions, is excited to announce its recent relocation to the Advanced Manufacturing Park (AMP) Technology Centre in Rotherham.

This strategic move supports Taconova's mission to deliver cutting-edge hydronic solutions for heating, sanitary, and solar energy applications, reinforcing its commitment to efficiency and innovation.

"Our new location at the AMP Technology Centre positions us at the heart of a dynamic innovation community," said Behfar Abedinia, General Manager Taconova UK. "The facility is located at one of Europe's most important Advanced Manufacturing and Engineering clusters and provides us with opportunities to streamline operations and better serve our clients, all while collaborating with the rich manufacturing community based in and around the park."

Taconova UK was previously based in Sheffield, and this move marks a new chapter in the organisation's commitment to delivering comfort and efficiency through intelligent building technology while inspiring the next generation of engineers and technicians.

"The close proximity to the AMRC Training Centre and the wider talent pool that exists here will provide opportunities to expand our team with apprentice and graduate positions in the future," added Behfar Abedinia.

Coinciding with its relocation to Rotherham, Taconova UK has also welcomed three new faces to the business. Nadeesha Jayasinghe, Business Support Manager; Ravi Bhardwaj, Business Development

Manager; and Denise Neville, Head of Service Delivery and Operations, join the team to drive the

company's advancements in Metering and Billing and further bolster Taconova's expertise and customer service capabilities.

Taconova's comprehensive metering and billing services, spearheaded by Denise Neville, is tailored to meet the unique needs of social and private landlords, developers, and facility management companies. This service offers a complete end-to-end solution that covers every stage of the process including the supply and installation of metering hardware, billing, and energy efficiency monitoring.

Taconova's HIUs are designed to ensure seamless heat distribution in district and communal heating networks, with efficient energy transfer while minimising heat loss. This heating solution is perfect for social landlords, private landlords, and property management agencies who need dependable heating solutions that reduce energy consumption and operating costs.

Taconova UK is known for delivering reliable and innovative hydronic solutions. With over 60 years of experience, specialising in the manufacture of high-quality heat interface units (HIUs) and circulation pumps, Taconova provides products that ensure efficiency, longevity, and optimal performance for both residential and commercial heating systems.
