

The Clean Space acquires Cynergi

10 months ago

Specialist commercial cleaning company, [The Clean Space](#), has acquired Cynergi Cleaning and Support Services as part of its ongoing strategic growth plan. This acquisition is the company's largest to date increasing its turnover by around 30% and providing customers with enhanced service capabilities and a broader support network.

Cynergi shares a similar business model to The Clean Space, focusing on core cleaning services with additional support offerings like deep cleaning and occupational cleaning, provided either in-house or through reliable supply partners (e.g., hygiene and pest control services). Its client base includes the Home Counties which will support the ongoing geographical expansion by The Clean Space from its traditional London base.

All staff have transferred and will be integrated into The Clean Space ensuring a smooth transition with a focus on retaining their expertise and supporting their professional growth. This will also maintain continuity for all clients.

Charlie Mowat, CEO at The Clean Space, said: "Over the past seven years, we have completed several acquisitions, with our last two being the largest to date, expanding our footprint and enhancing our operational capabilities and service range. Cynergi is a good fit for us as they are a business with similar values, committed to operational excellence, client satisfaction, and a strong, positive workplace culture. This resonates with our ethos and goals for team and customer wellbeing."
