

Truvox International powers ahead with the launch of Multiwash™ PRO Battery

7 months ago

Global floorcare solutions specialist [Truvox International](#) has launched the new Multiwash PRO Battery – the latest addition to its successful Multiwash PRO scrubber dryer range. This follows the recent launch of the Multiwash PRO Steam and the full range preview at InterClean, Amsterdam in May.

Easy to use, manoeuvre and maintain, the new Multiwash PRO Battery scrubber dryer is designed for use in areas without power and is effective on all floors – with brushes available for carpets, hard floors, escalators and entrance matting.

“The Multiwash PRO Battery completes our Multiwash PRO range,” says Truvox International Executive Director, Gordon McVean. “Each machine in the range washes, scrubs and dries in a single pass, giving improved and unrivalled cleaning results, and leaving floors ready for your customers and staff to walk on.”

With a run-time of up to 60 minutes, the Multiwash PRO Battery delivers excellent productivity. The counter-rotating cylindrical brushes scrub and lift dirt, giving a more hygienic and deeper clean.

With no trailing cables, the Multiwash PRO Battery minimises the risk of trips and slips, and with a reduced 2-hour charge time, compared to the previous model, alongside a quick-change battery system, it also ensures minimum down-time when charging.

Optional accessories are available across the full Multiwash PRO range including: a 7-litre solution tank for greater productivity; a side brush, allowing cleaning right up to the edge; and a trolley which allows for easy transportation.

“The Multiwash PRO Battery is ideal for daily use in the education, retail and leisure sectors, and is also perfect for the healthcare and veterinary sectors,” says Gordon McVean. “Designed to be used in areas without power, the Multiwash PRO Battery delivers a quicker and more effective clean than traditional cleaning methods, saving time and money. Its ease of use and reliability also makes it an excellent option in the hire sector.”

The evolution of Multiwash

“Our popular Multiwash II had been the benchmark for scrubber dryers for many years, so when we launched the new Multiwash PRO range over two and a half years ago, our customers were surprised that we had been able to make it even better,” says Gordon McVean.

“As a leading global manufacturer and supplier of commercial and industrial floorcare machines, we have always prided ourselves in listening to our customers. The addition of Battery and Steam to the Multiwash PRO range is a direct result of customer input, coupled with our own diligent push for innovation and technical excellence.

“We are proud that all our floorcare machines have the reputation of being simple to use and easy to maintain. Since the pandemic, hygiene has become the biggest priority in all premises and cleaning has become more of a ‘front of house’ activity, so the other priority has been to ensure that our machines look great. These two new additions to the Multiwash PRO range certainly follow those principles.”
