

Leading global property management consultancy appoints Spectrum again

12 months ago

[Spectrum Services Solutions](#) has been awarded a new contract from existing client, Knight Frank, further solidifying their strong working relationship. This new contract encompasses the provision of cleaning, consumables, pest control, and sanitary services at Sutherland House in St Vincent Street, Glasgow.

Sutherland House is a multi-tenant office building that has recently undergone a significant transformation, including upgrades to lifts, plant, and machinery, as well as a complete refurbishment of the reception and common areas.

Knight Frank is a globally renowned property consultancy with a vast portfolio of commercial properties under its management worldwide.

Spectrum's Operations Director, Rebecca Bell, was delighted with the contract extension and said: "Knight Frank is a valued client with which we have worked for many years. The fact that they are awarding us additional contracts speaks volumes about the excellent relationship we have with them and the quality of services we consistently deliver.

"We work hard to maintain and build strong ongoing relationships with all clients, and it's especially pleasing to me and the team at Spectrum when our good work results in additional contracts at new locations. Much of this is a result of good communication and the first-class performance of our people, for which I am very grateful. Likewise, we appreciate Knight Frank's trust in us and for enabling our relationship to flourish."
