

Multinational financial service provider banks on PTSG's expertise

1 year ago

[Premier Technical Services Group Ltd \(PTSG\)](#), via Neo Property Services, has been contracted to deliver specialist passive fire services for a French multinational universal bank and financial services company.

Engineers from Neo, which forms part of [PTSG Fire Solutions Ltd](#), will deliver a two-phase programme of repairs to fire doors within one of Manchester's most prestigious buildings. Having recently had its grandeur restored, the building now offers Grade A refurbished office space.

Access to the building is restricted, with no parking on site, which presents a challenge to challenge to PTSG's team. Furthermore, being a multi-tenanted building, operational works will, at times, run in parallel. Therefore, the management controls associated with day-to-day servicing and operation of the building need to be carefully planned and agreed with the building management team.

NEO's teams are experts at delivering vital fire safety works in this kind of busy environment. The bustling office environment means repairs must be conducted with minimal disruption to daily operations, as employees and visitors expect a seamless working atmosphere.

Ensuring fire doors are properly repaired is essential to maintaining compliance with fire safety regulations and protecting the safety of building occupants in the event of an emergency. PTSG specialises in the installation, inspection and repair of fire doors as part of a comprehensive approach to passive fire safety for its clients.
