

PTSG companies collaborate to deliver fire safety solution

1 year ago

Neo Property Services (Neo) and Trinity Fire and Security (Trinity), two constituent companies of [Premier Technical Services Group Ltd \(PTSG\)](#), are joining forces to deliver fire solutions at a modern primary school in London.

Situated in the London Borough of Hillingdon, the 80-place primary school is for pupils with special educational needs and disabilities (SEND). Conducting fire door inspections in such an establishment requires a highly sensitive and well-coordinated approach.

SEND schools cater to pupils with a wide range of needs, including physical disabilities, sensory impairments, and complex behavioural or emotional conditions. Ensuring that fire door inspections do not disrupt the school's carefully managed routines or cause distress to pupils is critical. The school environment is designed to provide a sense of safety and consistency for children and any work carried out must align with this ethos.

Neo and Trinity are both part of [PTSG Fire Solutions Ltd](#), the largest of the Group's five independent business divisions. Neo specialises in passive fire services, including fire doors, fire compartmentation and fire-rated glazing. Trinity delivers fire detection and life safety systems (including alarms, public address/voice alarms and portable fire extinguishers) and security systems.
