

# PTSG reinforces leadership team to deliver ambitious international growth plans

1 year ago

[Premier Technical Services Group Ltd](#) (PTSG) has made four new appointments in senior positions throughout the company, signalling its intent to deliver its ambitious plans for growth.

Alison Chard, Director of Value Creation and Project Management. Alison will play a central role in driving growth, optimising resources, and delivering successful projects that align with PTSG's goals. Alison reports directly to CEO Nikhil Varty.

Kate Williamson, Head of HR Operations and Business Partnership. Kate will combine operational efficiency with strategic collaboration, ensuring the Group's human resources function run smoothly while aligning HR delivery with broader business objectives.

Victoria Whittle, Chief Technology Officer. Victoria will be responsible for overseeing PTSG's technological direction. This involves aligning the Group's technology strategies with its business goals to drive innovation and competitive advantage.

Steven Miles – Head of Data and Analytics. Steven is a senior executive and will be responsible for overseeing PTSG's data strategy. He will be central in data-driven decision-making, leveraging analytics to support business goals. This role will provide valuable insights for the Group's success.

While PTSG has secured year-on-year growth each year since it began trading in 2007, its current plan of growth was boosted in 2019, when Macquarie's Principal

Finance business (Macquarie) acquired the Group at a value of over £300 million. Two years later, in 2021, Warburg Pincus invested more than £600m alongside Macquarie, supporting unprecedented growth potential for the company.

Nikhil Varty, Chief Executive Officer of PTSG, said: "Last year, we added Flame Control in the Netherlands (Fire Safety) and Whites (Electrical) to our portfolio as we continue to focus on new opportunities.

"2024 also saw PTSG significant growth, with a proportional uplift in the number of customers the company now serves. Going into 2025, we are making significant investments in a number of areas, including sustainable fuel technologies within our fleet, and new technology in areas such as customer relationship management and data warehousing.

"The four key new appointments to our leadership team will play a crucial role in maximising these investments. 2025 will be a year to watch PTSG as we continue to deliver our ambitious growth plan."
