

## SEE Services Awarded Framework Agreement with NHS Shared Business Services for Decarbonisation of Estates

6 months ago

**SEE Services**, a leading UK-based provider of facilities management and infrastructure support, has announced its selection as a supplier on the NHS Shared Business Services (NHS SBS) Framework for the Decarbonisation of Estates.

SEE Services has been appointed to Lot 1 – Decarbonisation of Non-Domestic and Public Buildings. Through this appointment, SEE Services will provide decarbonisation solutions to NHS SBS approved organizations across the South West, Wales, Scotland, and Northern Ireland.

The NHS SBS framework has been designed to allow NHS SBS organisations an opportunity to appoint single contractors to deliver multiple energy-saving initiatives. Under this framework, SEE Services will provide energy-efficiency measures including building fabric improvements, fenestration, ventilation, heating and cooling solutions, renewable technologies, LED lighting, electrical heating, building management systems, control interfaces, and hydrogen-ready combined heating and power solutions.

Anjub Ali of NHS Shared Business Services said, “With the announcement of over £1bn for public sector decarbonisation in the Autumn Budget 2024, the Department for Energy Security and Net Zero has confirmed funding for the next wave of the Public Sector Decarbonisation Scheme, this new framework will support the delivery of the NHS’s ambition in “Delivering a Net Zero Health Service” and a response to the profound and growing threat to health posed by climate change.”

About the Framework, Jeff Alden, CEO of SEE Services, said: “SEE Services is proud to be part of this

significant initiative to reduce carbon emissions and promote sustainability for NHS SBS organisations. This framework aligns with our commitment to drive sustainability in the built environment. Our expertise in innovative technologies and efficient estate management enables us to help our clients reduce both carbon emissions and operational costs, ensuring a positive, long-term impact.”
