

Zest Recycle renew waste management contract with Whistl

12 months ago

[Zest Recycle](#) has successfully renewed its waste management contract with [Whistl](#), the UK's leading logistics specialist. This renewal marks another exciting chapter in this ongoing partnership, reaffirming the companies' shared commitment to sustainable and efficient waste management solutions in the [logistics sector](#).

A Partnership Built on Trust and Results

Since the beginning of their collaboration, Zest Recycle has worked closely with Whistl to deliver tailored waste management services across their network. By understanding their unique needs, Zest has been able to provide:

- Comprehensive waste audits to identify areas for improvement.
- Customised recycling solutions to maximise resource recovery.
- Data-driven reporting to track and enhance performance.

These efforts have not only streamlined waste operations but also supported Whistl's sustainability goals, helping them reduce their environmental impact.

Driving Sustainability Forward

Renewing this contract highlights the success of this partnership and the mutual dedication to sustainability. Zest Recycle understands the importance of delivering innovative solutions that align with their clients' environmental objectives. Through their continued work with Whistl, Zest aims to:

- Further increase recycling rates.
- Explore new opportunities for waste reduction.
- Support Whistl in achieving their long-term sustainability targets.

A Testament to Expertise

Securing this renewal is a testament to the expertise and dedication of the team at Zest Recycle. They take pride in building strong relationships with clients, offering them the highest level of service and innovative approaches to waste management.

Roland Archer, Group Sales Director, Zest Recycle, said: “We are delighted to extend our long-standing partnership with Whistl. This renewal underscores the strength of our collaboration and shared commitment to sustainability. Together, we look forward to continuing to deliver innovative waste management solutions that make a positive impact.”
