

PTSG to work at life sciences project

1 year ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist Access & Safety systems at Tribeca – a transformative life sciences project in the heart of Kings Cross.

Ardmore is the main contractor and will deliver over 260,000 square feet of cutting-edge laboratory and office space, alongside residential units and vibrant public spaces within the final two plots of the master plan. The project will see the design and construction of five state-of-the-art buildings above a site-wide basement, with facilities tailored to meet the demands of modern science and technology sectors.

Sustainability is a key focus throughout the project. The BREEAM ‘Outstanding’ buildings are designed to achieve high environmental standards, with features such as energy-efficient systems, green roofing, and sustainable materials.

In a contract with Ardmore, engineers from [PTSG Access & Safety Ltd](#) will deliver the full design and installation of all roof and façade access systems at the new development.

For PTSG, access and safety encompasses all types of equipment that allows engineers to safely access all areas of every kind of building to carry out specialist services – from the installation, testing and certification of roof anchor points to the servicing and maintenance of the world’s largest BMUs.
