

Guardian Electrical Compliance announces nationwide Electrical Safety Seminars

1 year ago

After a 7-year hiatus, [Guardian Electrical](#), a [PTSG](#) company, and the UK's leading provider of electrical safety services, is returning with a series of informative and engaging seminars offering professionals in the electrical industry an opportunity to stay ahead of the curve with the latest developments and best practices.

The Electrical Safety Seminar Series kicks off at the iconic Imperial War Museum in Duxford, Cambridgeshire on Thursday, 20th March 2025!

Why Electrical Safety Knowledge is Critical in Today's Environment

Staying current with electrical safety requirements is no longer optional for organisations—it's essential. With regulatory frameworks evolving rapidly, technology advancements accelerating, and the serious consequences of non-compliance (including potential prosecution, financial penalties, insurance invalidation, and most importantly, risk to life), professionals responsible for electrical safety must remain vigilant and informed.

The Health and Safety Executive continues to pursue enforcement action against organisations failing to meet their electrical safety obligations. Recent prosecutions have demonstrated that pleading ignorance offers no protection under the law. As the seminars will emphasise: "In the eyes of the HSE, you, the Dutyholder, are guilty until you can robustly prove otherwise."

By attending these seminars, participants will gain the knowledge needed to implement robust electrical safety systems that protect both their organisation and its people, while potentially reducing unnecessary testing costs through more efficient compliance strategies.

Empowering Duty Holders with Critical Electrical Safety Knowledge

The upcoming seminars will feature industry-leading professionals delivering valuable insights on crucial topics including:

- BS7671:2018 Amendment 4 - Comprehensive overview of significant changes set to be implemented in 2026, including updates to electrical installation requirements and safety standards
- Electrical Vehicle Supply Equipment (EVSE) - Requirements, compliance, feasibility studies, and inspection protocols for EV charging infrastructure
- Panel Risk Assessments - Methodologies for identifying electrical hazards, documenting panel conditions, and implementing preventative maintenance strategies
- Surge Protection Devices (SPDs) - Implementation strategies, selection criteria, and regulatory requirements under BS7671:2018
- Arc Flash Hazard - Risk assessment, prevention protocols, and practical safety measures for technicians and engineers
- Dutyholder Responsibilities - Legal obligations, compliance frameworks, and best practices for meeting Electricity at Work Regulations 1989

Expert Speakers

Dr. Lee Wood, MSc PhD CMgr MCI CEng FIET, Principal Electrical Dutyholder for a FTSE100 company, will share real-world insights on discharging dutyholder responsibilities effectively. With 36 years of experience in senior engineering, maintenance, and project management roles, Dr. Wood offers invaluable perspectives on compliance management in large organisations.

Nationwide Seminar Locations and Dates

To ensure accessibility across the UK, seminars are being held at the following locations:

- Thursday 20th March 2025 - The Imperial War Museum, Duxford, Cambridgeshire

- Thursday 27th March 2025 - The Pullman Hotel, London

- Thursday 3rd April 2025 - The Dakota Hotel, Motherwell, Scotland

- Thursday 1st May 2025 - The Celtic Manor, Newport, Wales

- Thursday 8th May 2025 - The National Motorcycle Museum & National Conference Centre, Birmingham

- Thursday 15th May 2025 - Oulton Hall, Leeds

- Thursday 22nd May 2025 - Emirates Old Trafford, Manchester (New date added due to popular demand)

TraQ-it: Revolutionary Web-Based Compliance Management System

Attendees will also gain exclusive insights into TraQ-it, the industry's only truly interactive web-based electrical compliance reporting system. Developed over several years by Guardian's technical experts, TraQ-it ensures electrical safety records are always current, accurate, consolidated, and documented with a complete version history.

The system features innovative QR code technology that allows maintenance teams to instantly access distribution board reports and schedules via smartphone, significantly reducing response time during maintenance operations. This comprehensive digital solution helps organisations justifiably reduce testing levels and associated costs while maintaining full regulatory compliance.

Who Should Attend?

These seminars are ideally suited for a wide range of professionals responsible for electrical safety and compliance, including Facilities Managers, Health and Safety Officers, Electrical Engineers, Building Services Managers, Compliance Directors, Property Managers, and Maintenance Supervisors. Whether you're managing electrical systems in educational institutions, manufacturing facilities, healthcare environments, commercial properties, or public sector buildings, these sessions will provide valuable insights tailored to your specific compliance needs and challenges. The seminars also offer an excellent opportunity for electrical contractors and consultants looking to enhance their knowledge of current and upcoming regulatory requirements.

Seminar Benefits for Electrical Safety Professionals

The seminars will address common concerns of Dutyholders responsible for electrical safety:

- Staying updated with the latest changes in electrical safety legislation and technology
- Maintaining accurate and accessible electrical compliance records
- Managing electrical testing and compliance despite financial constraints
- Moving beyond a “box-ticking” approach to comprehensive electrical safety management
- Ensuring site compliance with limited time resources
- Understanding specific requirements for electrical vehicle charging infrastructure
- Implementing effective surge protection strategies
- Creating robust panel risk assessment programmes

Pricing and Registration

- Standard Price: £145.00 + VAT
- Existing Client Price: £95.00 + VAT

Seminar delegates will receive a comprehensive literature suite, including Guardian’s electrical compliance wall chart that serves as an essential reference tool for electrical safety professionals.

Industry-Leading Experience Across Diverse Sectors

Guardian Electrical Compliance Ltd, has established itself as the foremost expert in fixed wiring inspection and testing, delivering nationwide services to over 3,500 clients with a team of 300 dedicated professionals.

Guardian proudly serves a prestigious client base spanning multiple sectors, including:

- Education: Cambridge, Bath, Cardiff, Canterbury, Wolverhampton & Sheffield Universities
- Manufacturing: Caterpillar, Weetabix, Haribo, JCB, GKN, Toyota
- Industrial: BAE, GE Aviation, Tata Steels
- Sports & Entertainment: Manchester United
- Transport: Newcastle Airport
- Food & Beverage: Muller Wiseman Dairies

The company's extensive experience across these diverse environments ensures seminar content is practical, relevant, and applicable to real-world electrical compliance challenges.
