

PTSG moves into Rochester Riverside

1 year ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist electrical services at an exciting new neighbourhood in Kent.

Rochester Riverside is a flagship project in our regeneration programme. The site is made up of brownfield development land, stretching from Rochester Bridge to the north and Doust Way to the south.

As well as meeting Medway Council's objective of providing new homes and jobs for Medway, the Rochester Riverside development will bring other benefits including:

- a range of publicly accessible open spaces
- retail facilities
- leisure facilities
- improvements to the 'gateways' between the River Medway and Rochester High Street

Phase 7 sees the launch of the new four-bedroom show home (The Lapwing). Here, engineers from PTSG Electrical Services Ltd will deliver a new lightning protection system to protect the new development and all users in the event of an electrical storm.

[PTSG Electrical Services Ltd](#) is the UK's leading provider of lightning protection and electrical compliance services. As well as testing and inspecting systems, PTSG's highly trained engineers install bespoke and off-the-shelf systems and provide repairs, maintenance and upgrades where required.
