

PTSG to work on Grade I listed Norwich Guildhall

6 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist Access & Safety services at Norwich Guildhall.

Norwich Guildhall is a Grade I listed municipal building on Gaol Hill in the city. The guildhall was commissioned after Henry IV awarded a charter which gave the City of Norwich autonomy from the county of Norfolk. It was built between 1407 and 1413.

In summer 2008, the guildhall became one of the twelve historic Norwich buildings in the Norwich 12 initiative, a project to develop an integrated group of heritage attractions in Norwich. In July 2010 work began on the restoration and strengthening of the guildhall clock tower and, in 2014, the Norwich Heritage

Economic and Regeneration Trust took a 25-year lease on the building with a view to making it more accessible to the public.

In this contract with Norwich Council, engineers from [PTSG Access & Safety Ltd](#) will deliver SFS Horizontal Lifelines to the guildhall. SFS horizontal lifelines are fall protection systems designed to provide continuous safety for workers operating at height. They are typically installed on rooftops, industrial sites and construction areas where fall hazards exist.
