

Celebrating excellence: TEC named finalist in prestigious BizX Awards

5 months ago

Total Environmental Compliance (TEC) has been recognised among the top 5 finalists in two competitive categories at the prestigious BizX Awards for Best Business Growth and Fastest Growing Company.

Last week, Managing Director Mark Drinkhill and Faye Brown Business Support and Project Facilitator represented TEC at the awards ceremony, which celebrates business excellence across the UK, Europe, Middle East, and Africa. With over 100 businesses in attendance, making it to the final five in both categories marks a significant milestone in our journey.

Mark explains: “Being recognised among the top five in both the Best Business Growth and Fastest Growing Company categories is testament to the hard work and dedication of everyone at TEC. While we didn’t take home the top prize, competing at this level against businesses across multiple regions demonstrates how far we’ve come as an organisation.”

As specialists in water hygiene and Legionella compliance with three decades of industry expertise, we’ve built a reputation for delivering tailored water safety solutions that our clients can rely on. This recognition comes as we celebrate our 30th year in business and prepare to expand our service offering.

Mark continues: Our growth hasn’t happened by chance. It reflects our commitment to becoming true experts in water safety, investing in innovative technology, and maintaining the personalised service our clients value. Behind every compliance check and every system maintenance, there’s our unwavering focus on protecting people’s health and safety through proper water management.

TEC’s success story includes serving over 170 customers across numerous sectors and maintaining compliance at more than 25,000 sites throughout the UK. This growth has been possible through our

combination of technical expertise, investment in cutting-edge technology, and our unwavering commitment to customer service.

As part of the Premier Technical Services Group Ltd (PTSG), TEC continues to strengthen its position as a market leader in environmental consultancy, water treatment, water hygiene, and remedial services.
