

Guardian Electrical Compliance to host electrical safety seminar in Newport

4 months ago

Guardian Electrical Compliance – a constituent company of [Premier Technical Services Group Ltd](#) (PTSG) – is set to host the fourth event in its nationwide Electrical Safety Seminar Series on Thursday 1 May.

Taking place at the prestigious Celtic Manor in Newport, Wales, the session is aimed at duty holders with responsibility for electrical safety across the built environment. The free seminar offers practical insights into critical areas of compliance and emerging risks.

Topics on the agenda include:

- Dutyholder Responsibilities
- Incoming Amendment 4
- Panel Risk Assessments
- Electric Vehicle Supply Equipment
- Surge Protection
- Arc Flash

The event forms part of Guardian's ongoing commitment to improving electrical safety awareness and helping facilities professionals stay ahead of regulatory changes.

Following the Newport event, three more seminars are scheduled:

- Thursday 8 May – The National Motorcycle Museum & Conference Centre, Solihull
- Thursday 15 May – Oulton Hall, Leeds

- Thursday 22 May – Manchester (venue to be confirmed)

Those interested in attending can register their interest via the Guardian website or through the dedicated LinkedIn event page. Due to high demand, a waiting list has been created – attendees will be notified via email once places become available.

The Electrical Safety Seminar Series has been well received across the UK, offering a valuable forum for compliance professionals to hear from experts, ask questions, and share best practice.
