

Securing a Safe, Compliant and Sustainable Campus

1 year ago

Electrical Test Midlands (ETM) successfully secured a prestigious five-year contract with Warwick University for [fixed wire](#) and [Portable Appliance Testing \(PAT\)](#) services. The tender process was highly competitive, with several established companies competing for the contract.

To stand out, ETM focused on understanding Warwick's unique requirements and tailoring our proposal to match, demonstrating all of the following and more.

- Extensive experience in fixed wire and PAT testing
- Compliance with the latest standards and safety regulations
- A customer-focused approach, offering responsive support and clear communication
- Sustainability initiatives, aligned with the university's green campus goals

By showcasing their technical capability and commitment to innovation, ETM proved they were the ideal partner to support Warwick's high standards.

Challenges Faced by Warwick University

Warwick University required a contractor who could ensure the safety, compliance and reliability of their vast electrical infrastructure. Their key challenges included:

- Maintaining stringent safety standards across a large campus

- Reducing downtime and disruption during testing procedures
- Ensuring ongoing compliance with evolving regulations
- Aligning with sustainability targets through energy-efficient solutions

They needed a partner who could not only conduct thorough testing but also offer long-term support and strategic planning.

ETM's Solutions and Ongoing Support

To address these needs, Electrical Test Midlands proposed a comprehensive plan built on three pillars: expertise, communication and proactive risk management.

Key elements of our solution included:

- Scheduled, rigorous testing to minimise risk and disruption
- Immediate response to any identified issues
- Detailed reporting to keep facilities management informed and compliant
- Collaborative working relationship to ensure feedback is acted upon quickly
- Sustainability strategies that reduce energy use and improve efficiency

ETM's proactive maintenance approach will ensure that Warwick's facilities remain safe and compliant, while our ongoing support guarantees adaptability as the university's needs evolve.

Looking Ahead

Electrical Test Midlands is proud to support one of the UK's leading academic institutions. This contract not only reinforces ETM's standing as a trusted provider in the electrical testing sector but also represents a shared commitment to safety, innovation and sustainability.

With a focus on partnership and performance, ETM looks forward to delivering exceptional results and building a safer future for Warwick University.
