

BPMA launches new brochure to promote careers in the pump industry

3 months ago

The British Pump Manufacturers Association (BPMA) has unveiled a new brochure, *Pumps: A World of Opportunity*, aimed at inspiring interest in the wide array of career paths available within the pump industry.

This professionally produced publication showcases the vital role pumps play across multiple sectors—including energy, water, manufacturing, construction, and more—while highlighting the exciting, diverse, and rewarding career opportunities that exist within this often-overlooked field.

As the UK's leading trade association for pump manufacturers and suppliers, the BPMA is committed to supporting the future of the industry by attracting new talent. *Pumps: A World of Opportunity* offers insights into various roles, from engineering and design to sales, marketing, and sustainability-focused careers.

Wayne Rose, Director and CEO of the BPMA, commented: "Pumps are essential to everyday life, yet the industry's contribution is not widely recognised. This brochure aims to shine a light on the sector and the exciting prospects it offers to the next generation of pump professionals."

A digital version of the brochure is now available to view on the homepage of the BPMA website – <https://www.bpma.org.uk/>.
