

Jacksons Fencing debuts EuroGuard® V Mesh online

8 months ago

[Jacksons Fencing](#), a leading manufacturer of high-quality fencing and security solutions, has launched its versatile EuroGuard® V Mesh fencing system online.

This expansion gives commercial developers and specifiers immediate, streamlined access to secure fencing solutions. By simplifying the specification process, it supports more efficient project planning and empowers professionals to make faster, more informed decisions.

Discreet, durable security for modern developments

The EuroGuard® V Mesh fencing system is a popular choice for its combination of strength, aesthetics, and unobtrusive design. Ideally suited for residential developments, schools, commercial premises, and other low-risk environments, it offers a balance of visual appeal and dependable security.

Made from high-quality steel, EuroGuard® V Mesh fencing features rigid 3-metre V-profiled panels secured with tamper-proof clips on the protected side to deter vandalism. Its design balances strength and visibility, while a durable powder-coated finish in green or black blends easily with modern developments.

Like the wider Jacksons Fencing range, the EuroGuard® V Mesh system is built with durability in mind. Backed by a 25-year service life guarantee, it is a reflection of the company's focus on long-term performance and sustainability.

Peter Jackson, Managing Director, Jacksons Fencing comments, "Making EuroGuard® V Mesh fencing available online gives specifiers and developers a faster, more accessible way to choose a compliant, high-performance fencing solution guaranteed to withstand the test of time. Providing the option to shop this

fencing range online has helped simplify the specification process, support quicker decision-making, and helps integrate security seamlessly into a wide range of projects, from commercial developments to schools and housing schemes.”
