

PTSG completes proactive roof maintenance at Suffolk commercial site

2 months ago

Specialists from NSS, a constituent company of [Premier Technical Services Group Ltd \(PTSG\)](#), have delivered planned roof maintenance at a large commercial property in Suffolk, aimed at improving aesthetics while safeguarding the building against future issues.

Routine maintenance is key to extending roof lifespan, ensuring compliance with industry regulations, and preventing wider structural damage. The works carried out by NSS were completed with no disruption to day-to-day operations at the site, thanks to the team's strategic planning and expertise.

All NSS teams are fully insured and certified, with work tailored to meet the specific requirements of each site. PTSG's use of diverse access solutions – particularly truck-mounted platforms – allows for quick mobilisation and efficient delivery, avoiding the costs and delays associated with scaffolding.

Each project is supported by comprehensive reporting, including photographic documentation of the roof's condition and recommendations for any necessary repairs or improvements.

This latest project highlights PTSG's commitment to delivering high-quality, non-intrusive solutions that support long-term asset protection for commercial clients.
