

PTSG to showcase integrated compliance solutions at Housing 2025

11 hours ago

The banner features the Housing 2025 logo with the dates 24-26 June Manchester Central and the tagline 'Uniting the sector. Making lives better.' It also includes the PfiH LIVE 2025 logo. The main text states: 'PTSG, with constituent companies Total Environmental Compliance, NEO and ECS Group, will be proudly displaying our services at Housing 2025, Manchester Central, on 24-26 June'. Below this, three columns highlight the constituent companies: Total Environmental Compliance (delivering water safety services), NEO (fire safety specialists), and ECS (electrical compliance and safety). The bottom section features the PTSG logo and the text: 'We look forward to seeing you at Stand B34 from 24-26 June.'

[Premier Technical Services Group Ltd \(PTSG\)](#) will be exhibiting at Housing 2025, the UK's largest event for the social housing sector, where three of its leading compliance specialists – ECS, TEC, and Neo – will present a fully integrated approach to safety and compliance.

Visitors to Stand B34 will have the opportunity to explore how this combined expertise in electrical, water and fire safety is supporting housing providers in delivering safer, more compliant homes, while driving down complexity and cost.

A streamlined approach to housing compliance

Housing providers are often faced with managing multiple contractors, inconsistent reporting, and complex scheduling – all while trying to maintain high safety standards. PTSG's integrated solution, powered by its specialist companies, offers a coordinated, technology-driven model that simplifies compliance management.

ECS – Electrical compliance made simple

ECS has transformed the way electrical safety is managed in social housing, delivering over 200,000 EICRs with a 98% first-time fix rate. Their in-house software platform, ARC Hub, gives providers real-time compliance visibility and enables multiple services in a single visit.

TEC – Protecting residents through water safety

With over 30 years of experience, TEC helps manage Legionella risk and water hygiene with services ranging from remote temperature monitoring to environmental consultancy. Their approach prioritises both compliance and resident wellbeing.

Neo – Delivering fire safety when it matters most

Neo provides comprehensive fire protection services, from fire door and compartmentation surveys to fire stopping and installation of fire-rated glazing. Their work ensures buildings meet the highest fire safety standards while planning for long-term protection.

Integrated services, proven results

Together, ECS, TEC, and Neo deliver:

- Access via leading procurement frameworks such as Fusion 21 and CHIC
- Coordinated delivery to minimise disruption for residents
- Centralised reporting across all compliance areas
- Long-term cost savings, with clients seeing an average 23% reduction in compliance spend

Join the conversation at Housing 2025

PTSG's team will be available at Stand B34 to discuss practical strategies for simplifying compliance, using technology to improve outcomes, and reducing operational overheads. As one of Europe's leading providers of specialist services to the construction and FM sectors, PTSG continues to innovate in support of safer, more efficient social housing.
