

STIEBEL ELTRON UK unveils hpnext

11 months ago

STIEBEL ELTRON UK is proud to announce the launch of its hpnext series, a brand-new generation of highly efficient, ultra-quiet heat pumps, making their debut at InstallerSHOW 2025.

This major product launch includes a new air source heat pump range, a new ground source heat pump range, and an innovative integrated internal air source heat pump with MVHR.

All models in the hpnext series use R290 refrigerant and feature a wide range of design and functional upgrades that mark a significant step forward in heat pump technology.

InstallerSHOW 2025 will also be the first opportunity to see STIEBEL ELTRON's new centralised MVHR units, the VRC Premium range, offering visitors a first look at this recent addition to the ventilation portfolio.

Visitors are invited to Stand G580 to explore the hpnext series in person. The STIEBEL ELTRON team will be on hand for demonstrations and to discuss the latest developments in low-carbon heating and ventilation.

As part of the event, attendees will also have the chance to take part in the STIEBEL ELTRON 'Gold Bar Challenge', where they can be in with a chance of winning an instant hot water tap.

John Felgate, Managing Director at STIEBEL ELTRON UK, said: "The hpnext series represents a transformative step in our commitment to delivering cutting-edge, sustainable heating and ventilation solutions. These new products highlight our dedication to innovation, efficiency, and a greener future, addressing the evolving needs of both homeowners and installers.

"We're thrilled to unveil this next-generation technology at InstallerSHOW 2025, showcasing how it combines exceptional performance with environmental responsibility. And we look forward to connecting

with attendees and demonstrating how the hpnext series can revolutionise low-carbon living.”

Those interested in registering for a stand tour can do so via the link: www.stiebel-eltron.co.uk/en/home/landing-pages/hpNext-installer.html

Join us at InstallerSHOW 2025 to discover the future of heating and ventilation from STIEBEL ELTRON UK.
