

New Addition to Ansell's Healthcare Range Unveiled

11 months ago

[Ansell Lighting](#) has expanded its specialist healthcare range with the launch of the LuxMed Bedhead – a sleek and durable luminaire designed specifically for use in hospital wards and patient bedrooms.

Featuring a single-piece body design, the new luminaire provides enhanced infection prevention and stands up to the demands of intensive cleaning with hospital-grade disinfectants.

Built to last, the luminaire also offers IP44 ingress protection and IK06 impact resistance, and is backed by a 5-year guarantee for long-term performance and reliability.

Meeting LG2 requirements, the LuxMed Bedhead also features independent control of upward and downward light providing flexibility for both clinical tasks and patient comfort.

With DALI dimming as standard, the fixture allows precise control over light levels with OCTO smart functionality also available as an additional option.

The LuxMed Bedhead is also quick and easy to install with a first fix back plate making it ideal for new-build and refurbishment projects alike.

Mark Abbott, Managing Director at Ansell Lighting said “The LuxMed Bedhead is an ideal solution for healthcare environments where cleanliness and durability are paramount. Built to withstand rigorous cleaning regimes and deliver long-lasting performance, it also supports patient comfort and professional care delivery with its flexible lighting features.”
