

PTSG carries out full roof refurbishment for renowned car manufacturer

10 months ago

[Premier Technical Services Group Ltd](#) (PTSG), via its specialist building access company NSS, is currently delivering a comprehensive programme of roofing and testing services for one of the world's most prestigious automotive brands.

The client, a household name in luxury motoring, has a rich heritage dating back to the early 1900s. Originally involved in the manufacture of aero engines during the First World War, the company has since become synonymous with British engineering excellence. Post-1945, it relocated production to Crewe, where it began building complete vehicles—a tradition that continues to this day.

Technicians from NSS, part of PTSG's Building Access Specialists division, are undertaking extensive roofing works at one of the manufacturer's key sites in Pendle, Lancashire. The project involves a full roof refurbishment to deliver a high-performance finish that safeguards the facility for years to come.

Scope of works includes:

- Replacement of rooflights
- Full cleaning of the roof surface to remove deteriorated coatings
- Replacement of all roof fixings
- Ridge replacement
- Cut-edge corrosion treatment
- Complete respray of the roof covering

In addition to these works, NSS teams are also conducting vital testing services on the site's safety systems, helping to ensure continued compliance and safe access for future maintenance.

NSS is a core part of the PTSG Group and one of its largest subsidiaries. The business offers a wide range of services, including specialist façade and roof maintenance, fall protection system testing, and access equipment hire and operation—delivering safe, efficient and high-quality solutions to customers across the UK.

This project underscores PTSG's reputation for delivering best-in-class building services to high-profile clients across the manufacturing, automotive, and industrial sectors.
