

PTSG Secures Lightning Protection Contract at London Stadium

7 months ago

[Premier Technical Services Group Ltd](#) (PTSG) has been appointed to deliver specialist electrical services at London Stadium, one of the UK's most iconic multi-use venues.

Engineers from PTSG Electrical Services Ltd will design and install a new lightning protection system at the site, ensuring the continued safety of visitors, staff, and infrastructure in the event of an electrical storm.

Originally constructed for the 2012 Olympic and Paralympic Games, London Stadium now serves as the home of West Ham United Football Club. With a capacity of 66,000 — and 60,000 permitted for football matches — the venue also plays host to international sporting fixtures, concerts, and cultural events year-round.

As the UK's leading provider of lightning protection systems, PTSG brings extensive experience in delivering safety-critical solutions at high-profile, complex venues. The Group's end-to-end service offering covers installation, inspection, testing, and maintenance — supporting long-term compliance and operational resilience.

This latest contract reinforces PTSG's ongoing role in safeguarding some of the country's most prominent buildings and public spaces.
