

PTSG to work at community charity project

11 months ago

[Premier Technical Services Group Ltd](#) (PTSG), via constituent company HCS Water Treatment (HCS) has been contracted to deliver specialist services for The Lighthouse Project in Newcastle.

The Lighthouse Project arose from the passion of the founders for working with young people on the Byker Estate and the frustration with the lack of purpose-built facilities in the area to support this work. Their mission was to create an inspiring youth and community space in the heart of Byker that will support quality youth and community engagement and have a lasting impact on the community of Byker for many years to come. This has been achieved this through the renovation and repurposing of the old St Michael's Church building on Byker Hill into a flexible, multi-purpose, youth and community space with youth sports and activity facilities set in the grounds.

In this contract, engineers from HCS will provide a variety of water treatment services for Dana Petroleum. PTSG Water Treatment Ltd is one of the five independent business divisions of PTSG; the others are: PTSG Access & Safety Ltd, PTSG Electrical Services Ltd, PTSG Building Access Specialists Ltd and PTSG Fire Solutions Ltd.
