

ABM receives safety excellence gold for sixth consecutive year and celebrates double gold in 2025

11 months ago

ABM has been awarded two RoSPA Gold Awards in 2025 – one for Fleet Safety and another for Health and Safety Excellence. The acknowledgement marks the sixth consecutive year the company has achieved gold-level recognition for safety.

The ultimate symbol of achievement in safety and excellence, the internationally renowned RoSPA (The Royal Society for the Prevention of Accidents) Health and Safety Awards recognise organisations, teams, and projects across all sectors for their unwavering commitment to protecting lives. Earning a RoSPA Award not only honours an organisation’s accomplishments but also places them within a respected global legacy that champions accident prevention, high safety standards, and the well-being of individuals across workplaces, facilities, homes, and public environments.

Andy Lewinton, ABM QHSE Director, commented: “Continual improvement, collective ownership and proactive behaviour are what make these achievements possible; and every ABM team member should be proud of what we have achieved.

“To be recognised for the sixth consecutive year for our health and safety performance, and with a second gold for our fleet, demonstrates ABM’s deep-rooted culture of safety excellence. It is wonderful to see acknowledgement for our daily effort in ensuring our teams are engaged, empowered and equipped with the knowledge to work safely every day and deliver safe environments for our customers.”

This double gold achievement follows ABM’s annual Safety Week, held earlier this year, which saw team

members across the business engage in training, workshops, and initiatives focused on strengthening safety awareness and sharing best practice across all operational areas.
