

PTSG delivers total compliance – under one roof

3 hours ago

Premier Technical Services Group Ltd (PTSG) is setting a new standard in building compliance, offering clients a fully integrated, end-to-end service that simplifies operations, reduces risk and ensures complete peace of mind.

While many organisations still juggle multiple suppliers to meet their compliance needs, PTSG delivers a smarter alternative. With more than 3,000 specialists delivering over 170 services nationwide and overseas, the Group supports over 30,000 customers and manages compliance for more than 300,000 buildings.

The scale and impact are hard to ignore.

In the past year alone, PTSG has tested and certified more than 10,000 fall arrest systems – that's 27 critical safety checks every single day, protecting those who work at height. Meanwhile, its electrical teams completed over 10 million portable appliance tests, amounting to around 35,000 daily inspections – ensuring electrical safety across diverse portfolios.

Window cleaning remains another standout service, with 423,129 panes cleaned in 2024, alongside nearly 4,000 emergency call-outs, many involving broken or damaged glass.

PTSG's Fire Solutions division remains one of the UK's most active, surveying more than 40,000 fire doors a year and inspecting 80 new buildings every week – ensuring that customers' fire safety strategies remain robust and fully compliant.

Meanwhile, the Water Treatment team continues to protect thousands, working with over 30,000 tenants

annually to sample and monitor water quality, delivering thousands of Legionella risk assessments and hygiene checks.

Group CEO Greg Ward said: “We’re proud to offer our clients complete confidence in their compliance. When you work with PTSG, you get one trusted partner – no duplication, no gaps, and no missed deadlines. Just total clarity and complete support.”

To showcase the breadth of services and the measurable impact PTSG delivers, the company has launched a new infographic titled *Milestones and Momentum*, now available to explore online.

With ever-increasing regulatory demands and the pressure to ensure safety and compliance across multiple sites, organisations are turning to providers who can deliver scale, consistency and technical expertise in one place. For many of the UK’s leading businesses, that means PTSG.

Compliance doesn’t need to be complex. With PTSG, it’s simply taken care of.
