

PTSG secures fire and security contract with leading environmental engineering firm

3 days ago

Premier Technical Services Group Ltd (PTSG), through its constituent company Trinity Fire & Security (Trinity), has been awarded a contract to deliver specialist services for a prominent building services and environmental engineering business.

The Surrey-based company, founded in 1991 by two engineers with a vision for more customer-focused service delivery, has grown steadily while maintaining long-standing client relationships across London and the South-East.

Under the new contract, Trinity engineers will provide fire and security systems designed to protect the client's premises and safeguard building users.

Trinity is the largest company within PTSG Fire Solutions Ltd – the Group's biggest business division – and operates nationwide. Its teams deliver a wide range of services including fire detection and life safety systems, fire risk assessments, kitchen fire suppression and security solutions.

Earlier this year, Trinity introduced the MPF Portable Fire Extinguisher, a groundbreaking innovation in commercial fire safety. Capable of tackling all commonly occurring fire types – including Lithium-ion battery fires – the unit is the only one of its kind to meet BAFE requirements, with additional backing from Sedex, BSI and NTA.
