

PTSG to safeguard Oxford science hub with lightning protection

6 months ago

[Premier Technical Services Group Ltd](#) (PTSG) has secured a new contract to deliver specialist electrical services at ARC Oxford.

The development includes a 110,000 sq. ft. lab-ready science building, designed to provide high-quality space for the growing life sciences sector.

ARC – Advanced Research Clusters – is Europe’s leading provider of science and innovation hubs, connecting some of the world’s most advanced knowledge economies. Formerly known as Oxford Business Park, ARC Oxford is already a well-established employment location in the south of the city.

As part of this project, engineers from PTSG Electrical Services Ltd will install a new lightning protection system to safeguard both the building and its users during electrical storms.

PTSG is the UK’s leading provider of lightning and surge protection services, delivering inspection, testing, maintenance and upgrades alongside the design and installation of new systems – all to the requirements of BS EN 62305.
