

## [Bidvest Noonan Expands Partnership with Cardiff University, Doubling Campus Coverage](#)

9 months ago

**Bidvest Noonan** has expanded its partnership with Cardiff University, significantly increasing the scope of cleaning services delivered across the institution's estate. The new agreement doubles the number of university buildings supported, creating cleaner, healthier spaces for thousands of students and staff every day.

Cardiff University is one of the UK's largest higher education institutions, educating more than 33,000 students and employing more than 7,500 staff. Renowned for its research excellence and vibrant campus life, the University operates one of the country's most complex estates.

As a market leader in facilities services with a strong portfolio in the education sector across the UK and Ireland, Bidvest Noonan brings deep expertise in supporting world-class learning environments. Under the expanded contract, 97 new colleagues will join Bidvest Noonan's dedicated Cardiff team, further strengthening its ability to deliver consistent, high-quality services at scale.

With this agreement, Bidvest Noonan now provides cleaning services across both Cardiff University's North and South campuses, effectively covering almost the entire estate. Through this expansion, Bidvest Noonan has strengthened its presence, further cementing its position as a trusted partner to the higher education sector.

David Barker, Chief Growth Officer at Bidvest Noonan, said: "We are delighted to expand our partnership with Cardiff University after such a strong first year. Our team is proud to now support both North and

South campuses, ensuring high standards of cleanliness across the University's world-class estate."

David Manfield, Deputy Director of Estates & Campus Facilities, added: "Since the start of our relationship with Bidvest Noonan in August 2024, we've developed a quality, innovative and customer centric partnership ensuring university buildings are well-presented and conducive to a high-quality learning, research, and staff / student / visitor experience. We are delighted to be able to extend this partnership across the rest of our campus and look forward to further innovation".
