

Cardo secures 12-lot win on Greener Futures Partnership DPS

8 months ago

[Cardo](#) has been appointed to 12 lots on Greener Futures Partnership's (GFP) Dynamic Purchasing System (DPS), strengthening its role in delivering energy efficiency and decarbonisation upgrades to more than 300,000 homes across the UK.

The three-year DPS, launched in partnership with Contracting Authority Abri and managed by Pretium Frameworks, runs until October 2028 and is split into 32 lots – designed to help social housing providers cut carbon emissions, making homes warmer and more energy efficient.

Cardo's appointment spans a wide range of services and solutions, reflecting its expertise in helping housing providers meet their sustainability goals. The 12 lots cover insulation, heating, lighting, energy storage, and whole-house solutions across the UK.

Mark Cronly-Dillon, Group Business Development Director at Cardo, said:

“Being appointed to 12 lots on Greener Future Partnership's DPS is a major milestone for Cardo. It gives us the opportunity to deliver cutting-edge, sustainable upgrades at scale – from insulation and heating to glazing – helping thousands of homes on their journey to net-zero.

This appointment is perfectly aligned with our vision to lead the sector in decarbonisation and future-ready housing solutions, and it comes at a critical time as the UK government continues to drive towards net-zero social housing by 2050.”

This latest success reflects Cardo's vision to lead the sector in decarbonisation and its commitment to delivering long-term impact for residents and housing providers.
