

# Planon Recognised as an Industry Leader in CMMS by Independent Research Firm

8 months ago

Planon, the leading global provider of [integrated real estate and facility management software](#), has announced that it has been positioned as a Leader in the Verdantix Green Quadrant®: Commercial Buildings Computerised Maintenance Management Systems (CMMS) 2025.

Verdantix analysts highlighted Planon's strengths in upgrade-safe configurability, [IoT](#)-led automation and no-code workflows. The report also recognises Planon's predictive maintenance capabilities, supported through integrations with companies such as Schneider Electric. Digital twin functionality, real-time asset tracking and fault detection enable data-driven interventions and SLA adherence, making Planon a strategic choice for enterprises and service providers managing complex, multi-site portfolios.

Joy Trinquet, Senior Analyst at Verdantix, said 'Commercial building owners and facility directors face rising labour costs, aging infrastructure, regulatory pressures, changing tenant expectations and operational complexity. As a result, organisations are replacing legacy systems with CMMS solutions that optimise resources, streamline maintenance and maximise ROI. CMMS solutions, such as Planon's, are well positioned to support users with tailored maintenance, service and compliance workflows, and offer best practice templates that can be easily adapted to changing business needs.'

Peter Ankerstjerne, CEO of Planon, said 'We are proud that Verdantix has once again recognised our leadership in CMMS. Its report highlights both the robust functionality of our [Asset & Maintenance Management](#) (AMM) solution today and the strength of our future roadmap. As a core pillar of Planon's IoT-enabled [Integrated Workplace Management Solution](#) (IWMS), AMM not only underpins our platform but also represents a defining element of our company's strategy. This acknowledgement reflects our continued commitment to helping customers drive efficiency, compliance and sustainability across their real estate and facility operations.'

Download an excerpt of the Verdantix Green Quadrant®: Commercial Buildings Computerised Maintenance Management Systems (CMMS) 2025 report [here](#) to learn more.

[Verdantix](#) - an independent research and consulting firm with a focus on innovative technologies that optimise business operations - compiles this CMMS solution benchmark every two years, assessing the major vendors according to the capabilities of their software applications and the strength of their momentum in the market. In compiling the Green Quadrant, Verdantix looks at strategic success metrics including vision and strategy, installed customer base, organisational and financial resources. T

he Green Quadrant also assesses capabilities like IT systems integration, business intelligence, user interface, mobile apps, configurability, and enterprise reporting.
