

PTSG company secures water compliance contract for Liverpool parish centres

7 months ago

Total Environmental Compliance (TEC), part of [Premier Technical Services Group Ltd](#) (PTSG), has been appointed to deliver specialist water safety services across a number of parish centres in Liverpool.

The parish centres, many of which are linked to religious institutions such as the Archdiocese of Liverpool, play an important role in their communities. They offer event spaces and community facilities, including free tea and coffee, alongside their spiritual function.

Notable sites include the Liverpool Parish Church of Our Lady and St Nicholas – a key civic and maritime church – and the Church of St Luke, known locally as the Bombed Out Church, which has served as an events venue since the Second World War. Liverpool Cathedral, St Paul's Parish Centre and St Mark's Parish Centre are also among the locations to benefit from the new contract.

TEC engineers will deliver a programme of works to ensure full compliance with water safety regulations. Services include water hygiene, water treatment and remedial works, with the aim of safeguarding users against Legionella and other risks.

Part of PTSG's Fire Solutions division, TEC is a trusted partner for clients across all sectors. Its focus is on delivering safe, sustainable and reliable management of water systems, helping organisations remain compliant while saving time and costs.
