

PTSG completes earthing project at major London data centre

10 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has successfully delivered specialist electrical services at the London 1 Data Centre in Dagenham, working with main contractor Laing O'Rourke.

The first phase of the development provides 12,800m² of server space with capacity for 32MW of critical IT load. Once fully complete, the site will double to 25,600m² and support 64MW, operating alongside NTT Data's facilities in Hemel Hempstead and Slough.

Engineers from PTSG Electrical Services Ltd carried out essential earthing repairs at the centre, earning strong recognition from the client. They praised the team's professionalism, noting the pressures of delivering complex works within a highly sensitive data environment.

As the UK's leading provider of lightning protection and earthing services, PTSG offers a full range of solutions – from design and installation to testing, inspection and maintenance of lightning and surge protection systems.
