

PTSG lands contract at RAF base

2 days ago

Premier Technical Services Group Ltd (PTSG), via constituent company Trinity Fire & Security (Trinity), has been contracted to deliver specialist fire and security works at a Royal Air Force station near St Ives, Cambridgeshire, England.

The airfield is decommissioned and the station is now under the command of UK Strategic Command. The base is home to the National Centre for Geospatial Intelligence (NCGI), which provides Open Source Intelligence (OSINT) and Geospatial Intelligence (GEOINT) support to HM Armed Forces. It also contains the Ministry of Defence Police Headquarters, the Defence Infrastructure Organisation Regional Headquarters, 42 Engineer Regiment (Geographic), and several other UK and Allied capabilities, authorities, and departments.

In this contract, engineers from Trinity will deliver fire and security assets to a new-build installation at the base. PTSG Fire Solutions Ltd is the biggest of the Group's five business divisions. Trinity is the largest component company providing services for that division, with offices spanning the length of the UK. Its specialists provide services including, but not limited to:

- Fire detection and life safety systems
- Fire risk assessment
- Security systems
- Kitchen fire suppression systems
