

PTSG subsidiary delivers compliant dry risers in Maldon

8 months ago

UK Dry Risers Maintenance (UKDRM), part of [Premier Technical Services Group Ltd](#) (PTSG), has completed a dry riser installation at a new development in Maldon, Essex.

The project was delivered in line with BS 9990 standards, with the system fully pressure-tested, certified and handed over ready for use by Essex County Fire and Rescue Service (ECFRS).

ECFRS is one of the UK's largest fire and rescue services, covering a population of more than 1.7 million people across 1,338 square miles. Its 50 fire stations – a mix of wholetime and retained – provide emergency cover across both urban centres and rural communities.

The installation in Maldon ensures the building is equipped with a reliable, compliant fire safety system, supporting both the developer and local fire service in protecting people and property.

As part of PTSG Fire Solutions Ltd, UKDRM works nationwide to provide safe, professional dry riser installations and ongoing maintenance. The company emphasises that fire safety should form the foundation of every building project, with systems rigorously tested to meet all regulatory standards.
