

phs Compliance appoints new Managing Director

4 months ago

[phs Compliance](#), one of the UK's leading providers of FM and compliance services, has appointed Jonathan Mackie as Managing Director.

Based in Warrington, [phs Compliance](#) works with over 35,000 business sites across the country providing everything to stay safe and compliant, including electrical testing and remedial services and fire systems service and maintenance.

Jonathan Mackie joins phs Compliance, which is part of the phs Group, with over 25 years' experience as a commercial director and an extensive background in global service links. Prior to joining phs Compliance, Jonathan was global commercial director for a major multinational company and has spent the majority of his career working in commercial facilities management services.

Jonathan said: "phs Compliance has an excellent reputation with its customers and I want to build on that. I want a relentless focus on customer service to ensure we are delivering the highest quality and standards.

"Innovation will also be a focal point to ensure we keep ahead of the market and deliver the most robust, solutions-led customer experience in the country. We have nation-wide reach, so we are in a strong position to be a single service provider for all businesses with UK wide estates.

"We know that our incredible team stand at the heart of the business. They will be crucial to our future success and we want to look after them. We want people to enjoy working at phs Compliance in a professional, yet fun, environment where they can develop and thrive.

“We will be driving growth and performance in line with our customers’ needs, and the shifting market, with the ambition to become the largest, best performing provider of FM and compliance services in the UK.”

With over 50 years’ experience, phs Compliance is fully accredited by all leading industry regulatory bodies and has the largest team of specialist statutory testing operators in the industry with over 400 engineers. Each year it carries out around 14 million compliance inspections.

It provides statutory electrical services including testing (including portable appliance tests and fixed electrical tests), fire safety testing, inspection services, maintenance and remedial work. It also provides specialist electrical and mechanical project services, including design, supply and installation for everything from power to lighting.
