

PTSG to deliver fire solutions on national framework

9 months ago

Neo, part of [Premier Technical Services Group Ltd](#) (PTSG), has secured a place on the Fusion 21 National Building Safety and Compliance Framework, delivering specialist fire door inspections.

Fusion 21, a social enterprise dedicated to efficient and impactful public sector procurement, connects landlords with competent and specialist suppliers to ensure safe, compliant buildings across all sectors. Its framework model is designed not only to support compliance but also to embed social value into every contract.

Neo was appointed in June 2025 to Lot 7: Fire Safety Inspections, which addresses the evolving requirements of the Building Safety Agenda. The framework enables public sector organisations to access expertise that helps them manage risk, meet regulatory standards, and keep buildings safe for occupants.

As part of PTSG Fire Solutions Ltd, Neo provides a comprehensive range of passive fire services, including:

- Fire doors
- Fire-rated glazing
- Fire curtains and cavity barriers
- Fire stopping and penetration sealing
- Fire compartmentation
- Fire and smoke damper testing and maintenance
- Ventilation and ductwork cleaning

The appointment reflects PTSG's growing role in supporting public sector clients to meet their building safety obligations, while delivering the assurance of specialist expertise and nationwide coverage.
