

Mitie Retains Facilities Management Contract to Support the Welsh Government's Net Zero Goals

7 months ago

Mitie has been successful in securing a contract with the Welsh Government to provide facilities management (FM) services throughout its administrative estate for a further four years. The contract spans across nineteen buildings in Wales, one in London and one in Brussels.

Following Mitie's existing success helping to achieve an 82% reduction in carbon emissions across the estate since 2011, 32 Mitie colleagues, including a new Energy Manager, will work with Mitie's wider Net Zero team to support the Welsh Government's goal to be Net Zero by 2030.

Mitie will work to reduce the Welsh Government's carbon emissions by at least 5% across all sites and ensure that the maximum amount of waste is diverted from landfill.

Mitie is committed to supporting local communities with this contract and envisage investing £17.2 million over the potential life of the contract, into local Welsh businesses and organisations as part of its supply chain. All employees working for suppliers will be paid at least the Real Living Wage.

To further strengthen this, Mitie will also provide more than 50 full working days of business advice to micro, small, and medium-sized enterprises (MSMEs) and local colleagues will have access to the equivalent of over 16 years of mechanical and engineering apprenticeship training. In addition, colleagues and suppliers will also receive nearly seven full-time working weeks of Equality, Diversity, and Inclusion (EDI) training to help foster an inclusive environment across the estate.

Eustace Xavier, Finance Director, Technical Services, Mitie said: “We’re proud to continue our partnership with the Welsh Government, built on trust, shared values, and a deep understanding of the estate. This contract is more than Facilities Management, it’s about helping local communities thrive through our commitment to sustainability, local investment, and skills development.”
