

PTSG to deliver Access & Safety services at landmark Bristol development

2 months ago

[Premier Technical Services Group Ltd](#) (PTSG) has secured a contract to provide specialist Access & Safety services at Brabazon – one of the UK’s most ambitious mixed-use developments.

Located in Bristol, Brabazon is being transformed into a vibrant new urban quarter that will include homes, schools, shops, workspaces, and the new arena for the city’s music and events scene. The wider development, managed by YTL, also features extensive open spaces, landscaped areas and new transport links, including a dedicated train station.

At the heart of the fast-growing West Innovation Arc, Brabazon is helping to establish a corridor of advanced research, manufacturing and innovation stretching from the development itself to the Bristol & Bath Science Park.

As part of this project, engineers from PTSG Access & Safety Ltd will install a combination of freestanding and fixed guardrail systems to the exterior of the new buildings, providing robust fall protection for maintenance teams working at height.

PTSG is a leading provider of specialist safety systems across the UK, delivering a full range of fall arrest and restraint solutions designed to help operatives work safely and in full compliance with HSE standards and industry regulations.
