

EMCOR UK extends its partnership with the Department of Health and Social Care

4 months ago

EMCOR UK has secured a 5-year TFM contract with the Department of Health and Social Care (DHSC) following a competitive tender process through the Crown Commercial Services Framework. The contract will commence in the last quarter of 2025, providing national coverage to several facilities.

DHSC is a ministerial department supporting ministers to lead the nation's health and social care. Under the contract, EMCOR UK will provide facilities management services, including engineering, cleaning, security, and front of house and catering services. Services will adhere to strict audit standards and a proactive approach to risk management.

Kevin Childs, operations director at EMCOR UK, said: "We are delighted to have secured this contract with DHSC. As the incumbent comprehensive FM service provider, this win in a hugely competitive market demonstrates our team's expertise and knowledge. The contract will embody our values of 'Together as one' and 'Active and ambitious', ensuring we continue to innovate and provide best value throughout the contract term to such an important Government department."
