

Churchill Group Awarded Bronze EcoVadis Medal for its Sustainability Performance

2 months ago

[Churchill Group](#) has retained its Bronze EcoVadis Medal and improved on its score from last year, placing it in the 71st percentile of all companies rated.

The company's environmental performance was a particular highlight, with full marks for both certifications and coverage - reflecting the breadth of its ISO 14001 and ISO 50001 accreditations across its operations. It also achieved particularly strong improvements across labour & human rights, ethics, and sustainable procurement.

Churchill Group has also validated near-term science-based targets through the Science Based Targets initiative (SBTi), committing to reduce its Scope 1 and 2 greenhouse gas emissions by 50.4% by FY2032, aligned with the 1.5°C pathway.

The increasingly advancing sustainability landscape across the wider combined facilities services support activities sector makes being awarded, or retaining, an EcoVadis medal more challenging each year, and Churchill Group remains committed to maintaining its momentum.

Thomas Farrell, environment manager at Churchill Group, said: "Maintaining our EcoVadis Bronze Medal while improving our overall score is a fantastic achievement and reflects the real progress we're making across our business. We are proud that our sector is increasingly competitive, and we remain focused on strengthening our sustainability performance year on year."

EcoVadis is an independent provider of business sustainability ratings for over 150,000 companies.
