

Kimberly-Clark Professional Innovates Better Care for a Better World at Interclean

2 months ago

[Kimberly-Clark Professional™](#) invites visitors to Interclean 2026, to explore how the latest hygiene solutions for professional environments will help cleaning teams and facilities managers deliver Better Care for a Better World.

With over 150 years of expertise in the cleaning and hygiene sector, Kimberly-Clark Professional welcomes partners, end-users, and industry peers to meet its European leaders and experts. The leading global provider of hygiene, safety, and productivity solutions will highlight to the industry its mission to make a positive impact on the world by keeping people healthy, safe and sustainable.

The re-launched WypAll® X Series for industrial environments will be showcased, alongside updates to the ICON™ range, which continues to set new standards for dispenser design and hygiene performance.

Visitors will learn about the new and improved WypAll® X70 and X80 cleaning cloths, developed through Kimberly-Clark Professional's material science expertise and customer-focused insights.

The result is significant enhancements to its WypAll® X70 medium duty cleaning cloths and WypAll® X80 heavy duty cleaning cloths. Both cloths now offer enhanced absorbency and nearly 10% larger sheet sizes in popular jumbo roll and pop-up box formats, making them even better for soaking up spills to help reduce downtime and hazards.

Delegates at Interclean can explore all the latest technology and smart design across Kimberly-Clark Professional's unmatched portfolio of washroom and wiping brands, including the ICON™ Collection,

Kleenex® and Scott®.

Following the launch of ICON™ in Spain and France in 2025, more Kimberly-Clark Professional customers are benefitting from how controlled dispensing high-capacity systems provide washrooms with sustained cost, waste, and time savings. Visitors are invited to a demonstration of the ICON™ dispensers and the newest customer insights of the collection.

Visitors to Stand 10.301 will also experience Kimberly-Clark Professional's commitment to helping businesses navigate change through innovation and how, as a sustainability partner, it can help make a difference to the planet with pioneering products and services.
